Field	Value
Test Case ID	TC01
Summary	Create shared product review group using admin modal for product linking
Preconditions	User is logged in as admin. Products already exist in the catalog
Steps	1. Go to admin panel - Catalog - Products. 2. Open the product with SKU: 91-60011 for editing. 3. Click the button "Add shared product". 4. In the modal window, search and select products 91-60011_2 and 91-60011_3. 5. Ensure selected products appear in the list within the modal. 6. Click "Save" to save the product. 7. Confirm the success message appears (e.g., "Product saved successfully").
Expected Result	Products 91-60011_2 and 91-60011_3 are now linked to 91-60011 as shared review products. The relationship is persisted after saving and will be reflected in the shared reviews logic on frontend.
Priority	High
Status	Passed
